

TSBC-1546 Report - Grok 4.3 runnable-cell sweep

TSBC-1546 Report - Grok 4.3 runnable-cell sweep excluding TSBC-1484

Source issue: [TSBC-1546](#)

Parent issue: [TSBC-1543](#)

PDF filename: TSBC-1546-report.pdf

Report generated: 2026-07-30T16:50:31Z

Brand pack: stack-lab

Hypothesis verdict: CONFIRMED

Dispatched follow-up key: locked_except_TSBC-1484

Hypothesis

The non-[TSBC-1484](#) Grok 4.3 text-benchmark cells can be reconciled to decision grade from existing artifacts without rerunning, using console/API keys, duplicating [TSBC-1542](#), publishing, or changing live routing. If every runnable non-[TSBC-1484](#) gap is already covered, close this issue with `locked_except_TSBC-1484`.

Method

1. Used the scoped wake payload for [TSBC-1546](#): `reason=issue_status_changed`, `fallbackFetchNeeded=false`, `0` new comments, and harness-held checkout.
2. Did not start a Grok CLI run. No console/API key was used or requested, and no live routing or publishing change was made.
3. Checked the active power file `/Users/glad0s/paperclip/benchmark/.tsbc-power.json`; because this was reconciliation-only, the lane ran at `0` new concurrent runs.
4. Reconciled [TSBC-1269](#), [TSBC-1270](#), and local [TSBC-1394](#) evidence through issue comments, work products, downloaded attachments, PDF text, and raw JSON rows.
5. Preserved this issue's source plus render under `work-products/TSBC-1543/TSBC-1546/`.

Data

Source	Cell	Records	Served model evidence	MeanQ	MinQ	Decision
TSBC-1269	R1 bare auditor x10 full suite	120/120 ok	uploaded <code>runs.json</code> , summary JSON, runner log, PDF; served models <code>grok-4.3</code>	0.968	0.592	decision-grade
TSBC-1270	R1 bare ops x10 full suite	100/100 ok	uploaded PDF and closeout comment; PDF records fresh per-sample Hermes controls and served model <code>grok-4.3</code>	0.960	0.714	decision-grade
TSBC-1394	corrected mixed Spark rerun	21/21 ok	local raw JSON rows with <code>servedModelVerified=true</code> , <code>servedModelMismatch=false</code> , <code>servedModel=grok-4.3</code>	0.957	0.613	decision-grade supplemental

Total reconciled non-carve-out Grok 4.3 rows in this sweep: 241 .

Surface Coverage

Surface	Evidence	Reconciled rows	Result
Auditor	TSBC-1269 full x10 suite	120	no supplemental run useful
Ops	TSBC-1270 full x10 suite plus TSBC-1394 recency rows	103	no supplemental run useful
CV-review	TSBC-1394 corrected mixed rerun, two CV bands	12	no supplemental run useful for this 4.3 sweep
Engineer/summarize supplemental recency	TSBC-1394 mixed rows	6	covered as supplemental context
Paperclip fixture route	TSBC-1484 / TSBC-1475 chain	0 new rows here	explicit carve-out

Carve-Out

The only missing cell remains the [TSBC-1484](#) fixture route. I did not try to solve, substitute, or rerun that blocked cell. Per the parent instruction, [TSBC-1475](#) R1 `paperclip` full cell remains the carve-out candidate until the parent performs the post-20:00 local check.

Ledger Reconciliation

[TSBC-1546](#) created no new benchmark run, no Grok CLI calls, and no shared-ledger rows. The shared ledger did advance during the heartbeat due to other burn lanes, so this issue records a reconciliation note instead of claiming a ledger delta.

Artifacts

Artifact	Path
Human reconciliation source	work-products/TSBC-1543/TSBC-1546/reconciliation-TSBC-1546.md
Raw/session evidence manifest	work-products/TSBC-1543/TSBC-1546/raw-row-manifest.json
Ledger reconciliation note	work-products/TSBC-1543/TSBC-1546/ledger-reconciliation.json
Machine-readable verdict	work-products/TSBC-1543/TSBC-1546/verdict.json
Evidence bundle	work-products/TSBC-1543/TSBC-1546/TSBC-1546-raw-session-evidence.zip
PDF render	work-products/TSBC-1543/TSBC-1546/TSBC-1546-report.pdf

Verdict

CONFIRMED .

All runnable non-[TSBC-1484](#) Grok 4.3 gaps named in this issue are decision-grade from existing evidence. Close disposition: locked_except_TSBC-1484 .

TSKB Delta

None. This heartbeat applied existing TSBC artifact and closeout rules; it did not create reusable new process knowledge.

Render Command

```
~/scripts/brand-suite/brandsuite pdf --brand stack-lab -- \
  --input work-products/TSBC-1543/TSBC-1546/TSBC-1546-report.md \
  --out work-products/TSBC-1543/TSBC-1546/TSBC-1546-report.pdf \
  --title "TSBC-1546 Report - Grok 4.3 runnable-cell sweep"
```
